CICLO DE VIDA DEL SOFTWARE

Modelo Cascada

Planeación

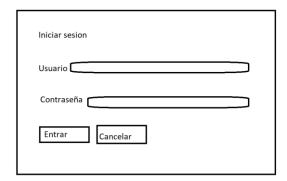

Realizar una aplicación que utilice Controles dinámicos; La aplicación será un entrenador del idioma inglés, en ella se mostraran palabras en ingles y el usuario deberá escribir su traducción en español, si la traducción es correcta se mostrara en la interfaz, si es incorrecta también se mostrara en la interfaz. También se creada una interfaz primaria que contendrá un usuario y una contraseña para ingresar al programa principal.

Análisis

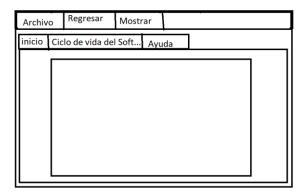

Para hacer este proyecto se necesitan conocer los controles dinámicos. En este caso se usaran solo algunos entre los cuales están:

- FlowDocumentReader
- Grid

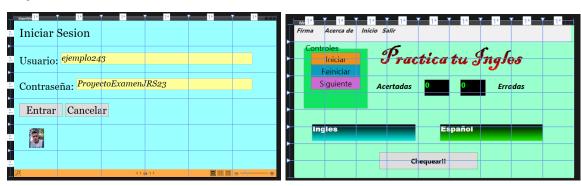

Diseño

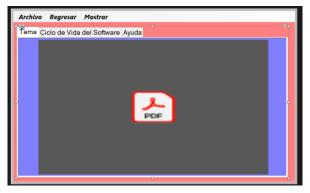

Implementación

Procesamiento
